2006 Tax-Credit Certified Technician

The Oregon Department of Energy has reviewed your application and has determined that you qualify as a Tax-Credit Certified Technician for the following technologies:

- Solar Electric (Photovoltaics)
- Solar Thermal
- Geothermal
- Duct Testing
- Heat Pump/Air Conditioning Diagnostics

As a Department of Energy Tax-Credit Certified Technician you may verify installation of a tax-credit qualifying system for an Oregon resident in the appropriate technology. By verifying a tax credit installation, you are ensuring the following:

1. The equipment was installed in accordance with the most current specifications in Oregon Administrative Rules (OAR 330-070).
2. You have explained the tax credit program process and pass-through option to the system owner.
3. The technical sections of the tax credit application are complete and accurate and the application has been given to the system owner. (The system owner is responsible for submitting the application to the Oregon Department of Energy to receive the tax credit.)
4. The system owner has a user manual and your employer has provided the owner with a written full warranty of the system to last no less than 12 months after installation.

Your employer will be listed on the Oregon Department of Energy Web site (www.oregon.gov/energy) as employing a Tax-Credit Certified Technician. We have sent a copy of this letter to your employer.

Please contact us within 30 days if there are any changes to the information you provided us on your application.

Sincerely,

Suzanne C. Dillard
Conservation Services Manager
